

## c-max U2 · the universal stair climber

Climbing stairs safely and comfortably

With the *c-max* U2 patients unable to walk can be transported comfortably and safely on even ground as well as upstairs and downstairs. There is little physical power and effort necessary for the attending person.

- ▶ Individually adjustable
- ▶ Can be operated by one person only
- ▶ Can be integrated into all current transportation vehicles (retrofitting possible)
- ▶ Single step switch - speed is continually adjustable
- ▶ Can be used on almost all stairs
- ▶ Various accessories such as a charging cable for the car and brackets for an oxygen tank are available
- ▶ Collapsible - thus very little storage room is necessary to transport the device
- ▶ Maintenance free and reliable due to a frequently proven climbing system
- ▶ Strong and sturdy - quality made in Germany

Automatic safety brakes  
brake at each edge of a step

## c-max U2 · mobile and safe

your compact companion at all times

This universally applicable device is folded without effort.

As a result the **c-max** is compact and small thus easily stored.

**c-max** is the ideal companion in everyday use both relieving personnel and increasing mobility tremendously.

Optionally available accessories such as head rests, safety belt systems, brackets for oxygen tanks as well as charging cables for the car increase the potential use of the device extensively.

The standard charger is suitable to currents of 100 V up to 240 V.

The **c-max** coincides with the guidelines for medical products of the European Union 93/42/EWG.
