Powerful support — for more pleasure undertaking things together

The ergonomic grips lay safely in your hands.

Often it is rather strenuous for a companion to push or brake the wheelchair. Especially going up or downhill asks for quite a lot of strength. Even small trips are often tiring and exhausting. The innovative pushing and braking aid *movilino* supports your companion thus providing more mobility.

Thanks to its enormous range the *movilino* is an indispensable attendant for your undertakings together.

The device can be mounted to virtually any type of wheelchair and because of its compact

measurements it is also easy to transport.

Its user-friendly technology makes handling very simple and it gives your companion a great feeling of security.

A spring system provides a pleasant riding experience even on craggy grounds. It balances out bumps and makes your drive comfortable.

In your grip is an integrated engine immobilizer protecting you from unauthorized use. If the chip is not inserted the *movilino* cannot be driven.

Useful accessories — for more safety and comfort

The delivery package of the movilino includes power kit, grips with control unit as well as the battery pack and the charger. Fixtures for almost all types of wheelchairs are offered as accessories.

We propose functional accessories to make an ideal adjustment to all types of situations possible.

Accessories for your movilino

Anti-tilt support

Spokes' protection

Mega battery pack

Left-handed operation

Brackets for the wheelchair

Voltage converter for the car

Innovative technology and new design — with movilino you can master all distances

Our aim at AAT is to offer you an aid for more mobility by intelligent and high-class technology.

All our experience and know-how based on many years of experience designing climbing aids and power systems for wheelchairs result in an improved system to alleviate your everyday life.
