

Bathroom Disability Positioning Solutions

We all need to bathe but the pleasure can be impaired if you need support. AAT's range of disability bathing positioning systems enable the bather to enjoy the experience, without the carer having to lean over and support them.

Why choose a bathing disability positioning system from AAT

- Relax! The bather can enjoy their ablutions or therapy. The carer doesn't have to support them. Better for everyone!
- Comfort and safety built-in: our systems ensure the bather is safely, comfortably and correctly supported.
- Support that goes the distance: our free no-obligation assessment considers all aspects - home environment, user and 'operator'. We personally set your stairclimbing wheelchair up for you and spend all the time you need to ensure you are comfortable using it.

Key features:

- Adjustable to each user, even in multi-user environments.
- Air dries.

Find the right one for you:

- **Aqua Liberty** - supporting freedom of movement whilst stabilising the body.
- **Bagel** - free-floating full body movement without risk of submersion.
