

The Stairclimber People

Six Reasons Why....to choose a Sella stairclimber

1. Free no obligation assessment

With any equipment, there's always the worry about whether it will work for you. That's why we offer a free, no obligation assessment, so you can 'try before you buy'...our highly trained experts can make sure the Sella works for you, your loved one, AND your stairs. If it doesn't, we will be honest and tell you. Your mobility and safety is paramount.

And, depending on your financial circumstances, you may not even have to buy one: if eligible (contact your Occupational Therapist), you can be supplied with one by your local Council: there are already 3500+ Sellas on Council 'books' so if one's available, you could get it within days!

2. Portable

Sella is not fixed in any way to your home. That means it makes life easier- and safer- for you and your loved one.

They only need to transfer onto the Sella from wherever they are in the home, and stay there to destination. No intermediate transfers on or off. No risk at the top of the stairs. It can even go outside! #freedomrestored. What's more, it folds down compactly: Sella can be stowed away in a cupboard when not in use or popped into the boot to open opportunities away from home...

3. No installation

So there's no worry about the strength of your walls to support it. No fixing to the walls, floor which impacts on you with mess, redecorating etc. It also means no delay waiting for a survey and installation. You achieve greater freedom of movement within days!

4. Adjustable

Sella is fully adjustable, for you as operator and your loved one as passenger.

When we initially deliver and train you in its use- all part of the process- we set the back height to suit you, so you feel comfortable and fully in control at all times.

For your loved one, we again set it up to ensure they are perfectly comfortable, safe and supported. And, as their needs change, we can alter the seating and support options to make sure their comfort and safety is assured going forwards.

5. Not limited by staircase design

Sella has been designed and engineered to accommodate almost every common staircase configuration. Its dimensions and construction means it can climb and descend even narrow stairs, stairs with twists, stairs with turns- it can even navigate spiral staircases!

6. Safe

Sella has an impeccable safety record stretching back more than 20 years. Our comprehensive training means you are fully equipped to operate it. It's designed to automatically pause on each riser to provide you with time to ensure continued, constant control. You can even stop it along the way. And we offer a range of annual service & maintenance packages, which we execute at your home, so you are never without it.
